Easy to maintain

# Latest generation paint treatment

---

The EVO+ treatment is the latest technology developed by ProTech Monte-Carlo Laboratories.

It combines the best of each treatment in a more technological solution that provides strong resistance to time and pollution.

It is the ideal solution for anyone who wants to keep their car in perfect condition, with routine maintenance greatly facilitated. The ProTech® EVO+ treatment enhances the colour, extreme shine and youthfulness of your car.

- + Certified results
- + Professional application
- + 5-year guarantee\*

*\*According to the PMC007 standard - Abrasion And Washability Evaluation, we guarantee that your EVO+ Treatment will withstand more than 200 washes (glove wash cycles and microfibre wipes according to our maintenance recommendations), i.e. more than 8 years of washing.*

# Certified results

## + A treated paint repels water and greasy pollution.

### SURFACE ENERGY MEASURES

Surface energy is used to measure the adhesion of certain molecules on a material.

To determine the surface energy of our ProTech® EVO+ treatment, we used the OWRK method.

The results are unequivocal. A painted surface treated with ProTech® EVO+ has a very low surface energy, better than ceramic treatments, that allows water and dirt to adhere less to the surface.

### HYDROPHOBIC MEASURES - GLIDING EFFECT

Pollution adheres less and your vehicle stays cleaner, longer. The EVO+ paint surface treatment makes it twice as easy for water and dirt to run off. The angle and speed at which dirt is removed is greatly reduced.

# EVO+

The drop slides

## 2X

more easily

Laboratory measurements made by Drop Shape Analyzer DSA30 according to ASTM D7334-08.  
Angle formed by a drop of water deposited on a surface.

# + Treated paint ages much slower.

To demonstrate the resistance of the ProTech® treatment to the ravages of time, we subjected it to the most demanding tests.

Among them, we exposed the EVO+ treatment to UV-C light, which accelerates the deterioration of the colour and gloss of the varnish. This allows us to compare the time it takes for a varnish to yellow and lose its shine with EVO+ treatment, compared to an unprotected surface.

*UV-C, with its short wavelength, is the most energetic and destructive UV. It allows for accelerated wear testing.*

# + A treated paint offers a 5-year protective shield.

The steps of this treatment are applied with dedicated equipment, exclusively by our certified technicians, under optimised conditions to offer you a permanent result.

## STEP 01

Decontamination of the surfaces to improve the adhesion of the treatment.

## STEP 02.1

Application of an active anti-UV, hydrophobic and oleophobic coating to ensure resistance, gloss and ease of cleaning.

## STEP 02.2

Crosslinking to create the permanent link between the treatment and the surface.

# Smart technology

Under daily use,  
your car stays  
clean longer.

Caring for your car  
has never been easier,  
faster or more enjoyable!

## + GLOSSY

By revealing the depth of a paint's nuances, the EVO+ Treatment brings unparalleled shine and gloss to all painted surfaces.

## + GLIDING

EVO+ Treatment technology offers advanced repellent properties, making it easier for liquids to drain from painted surfaces and slowing down dirt build-up.

## + EASY

These same properties allow you to save time and water in the cleaning of your vehicle, as well as in its daily aesthetic maintenance thanks to our dedicated products.

PAINT  
TREATMENT

# Technical features

---

- Permanent protection | POLLUTION, INSECTS, RESIN, UVS, ETC.
- Resistant to more than 8 years of washing\*
- Repellent properties | WATER, GREASY POLLUTION, DIRT
- Effortless cleaning
- Extreme shine, deep colour
- Professional application
- 5-year guarantee\*

## The Procace

---

After your car's treatment, we will give you the Procace. In it you will find all the products and accessories you will need for your car's maintenance and your certificate of authenticity.
