Protection,  
Extreme shine,  
long-lasting  
hydrophobicity

# ProTech<sup>®</sup> Monte-Carlo Ceramic+ Treatment

---

ProTech<sup>®</sup> CERAMIC+ is our most advanced solution for owners who want ceramic protection for their vehicles.

It takes the properties of SiO<sub>2</sub> technology to the extreme in an affordable solution.

Give your vehicle an unmatched shine, while enjoying the benefits of ceramic technology.

The ProTech<sup>®</sup> CERAMIC+ treatment guarantees deep colors and easy maintenance thanks to the hydrophobic effects of our technology.

## A complete solution

After the treatment, we provide you with compatible products and accessories for the routine maintenance of your vehicle as well as your ProTech<sup>®</sup> MC certificate of authenticity.

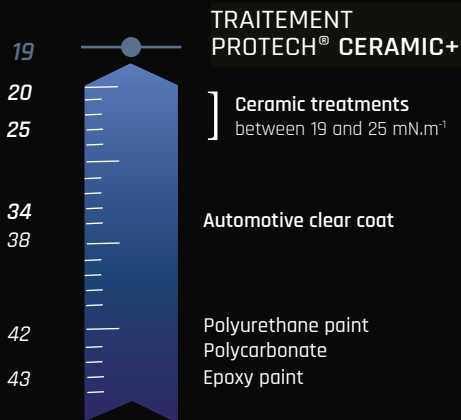

# Certified results

**+** Treated paint makes washing easier.

## SURFACE ENERGY MEASUREMENT

Surface energy is a measure of the adhesion of certain molecules to a material. To determine the surface energy of our ProTech® CERAMIC+ treatment, we used the OWRK method.

The results are unequivocal. A painted surface treated with ProTech® CERAMIC+ has a very low surface energy, better than most ceramic treatments, and thus allows water and dirt to adhere less to the surface.

## HYDROPHOBICITY MEASUREMENT - SLIPPERY EFFECT

Pollution adheres less and your vehicle stays cleaner, longer. The CERAMIC+ paint surface treatment allows water and dirt to flow off much more easily. The angle and speed at which dirt is removed is greatly reduced.

# Technical characteristics

- Permanent protection | POLLUTION, INSECTS, RESIN, UVS, ETC.
- Resistant to more than 4 years of washing\*
- Water, dirt and grime repellent properties
- Hydrophobic and water-repellent | EFFORTLESS MAINTENANCE
- Extreme shine, deep color
- Professional application
- 3 year warranty\*

*\*According to the PMC007 standard - Abrasion And Washability Evaluation, we guarantee that your CERAMIC+ Treatment will withstand more than 100 washes (glove wash cycles and microfibre wipes according to our maintenance recommendations), i.e. more than 4 years of washing.*
